Oryve Platforms Litepaper
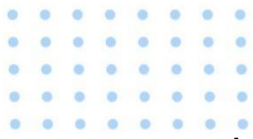

Table of Contents:

1. Oryve as a DAO

Oryve should widely be considered to be a Decentralized anonymous organization, which has several follow ups and differences while compared to a regular, established organization.

For an instance, There is no "executives", no "managers" nor any sort of official position, except for:

- Developer

- Moderators

- Official Team Members

Other people are always viewed as "community members" and none shall be discredited.

No identity is expected to be public, though if any team member (or a higher rank activist) decides to unveil his identity, we do not exclude this particular persona. He/She will remain a part of Oryve, despite not being anonymous.

1.1 Activities Forms

As previously mentioned, Oryve is decentralized and community driven.

Which leads to a few forms of activity taking:

- Developer Decision

- Team Members Common Decision

- $OVE Token Holders Pool

- Public Pool

Whilst development goes onward, new forms of activities may be added.

1.2 Information Sources

Oryve activities will regularly be published in official Oryve medias, this includes:

@oryve on Telegram

@oryverse on Medium

Oryve.xyz website

r/Oryverse on Reddit

@oryve_tech on Youtube

@oryverse on Instagram

All information shall be published on Telegram channel and/or Telegram Announcement channel.

1.3 Oryve Contact

We stay open about common opportunities, henceforth we encourage you to contact us through our e-mail and Telegram,

E-mails list as of 03.14.2023:

support@oryve.xyz

services@oryve.xyz

robotic@oryve.xyz

Telegram tags as of 03.14.2023:

@xR080t1c

@support_oryve

1.4 Oryve Tech Stack

Technology Stack for Oryve project is widely not defined and will be developed over time

2. Oryve Goals

Main Goal is to create the "Oryverse" which is a virtual world full of avatars, anonymous or not, interactive and safe environment for everyone to use. Oryverse could be used as a fun way to interact with friends, or to prosper a virtual office for your business. Options are very much limitless. It's like transfering a real world into a digital space.

2.1 Oryverse Features

- Lightweight

- Available to everyone

- Decentralized

- Community-Driven

- Multi-directional

2.2 Oryverse Future Goals

- Multiple public rooms to join

- Incorporate VR glasses experience

- Incorporate Augmented Reality in real buildings

for a deeper immersion

2.3 Oryverse Experience

Oryverse aims to recreate a super lightweight version of a virtual world, allowing businesses, creators as well as regular people to interact, which then creates a "layer 2" environment for users.

Henceforth Our top priority is availability.

3. OVE Token Utility

$OVE is a maintenance subject for Oryve project & Oryverse.

$OVE will be used to proceed transactions inside Oryverse.

3.1 OVE Trading

$OVE will initially be tradable through a decentralized exchange "PancakeSwap" with a liquidity pair with a native Binance Smart Chain Token "BNB".

PancakeSwap being decentralized does not require your data, it just proceeds blockchain transaction.
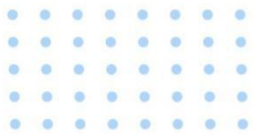

Every Transaction of $OVE is subject to 3% Fee, this includes:

2% Marketing/Development Fee (Refereed to as Marketing Fee)

1% Liquidity Pool Fee

Marketing/Development Fee Funds will be used to progress the growth of OVE Token and maintain Cloud Servers for Oryverse, that is why we call it "self-sustainable system".
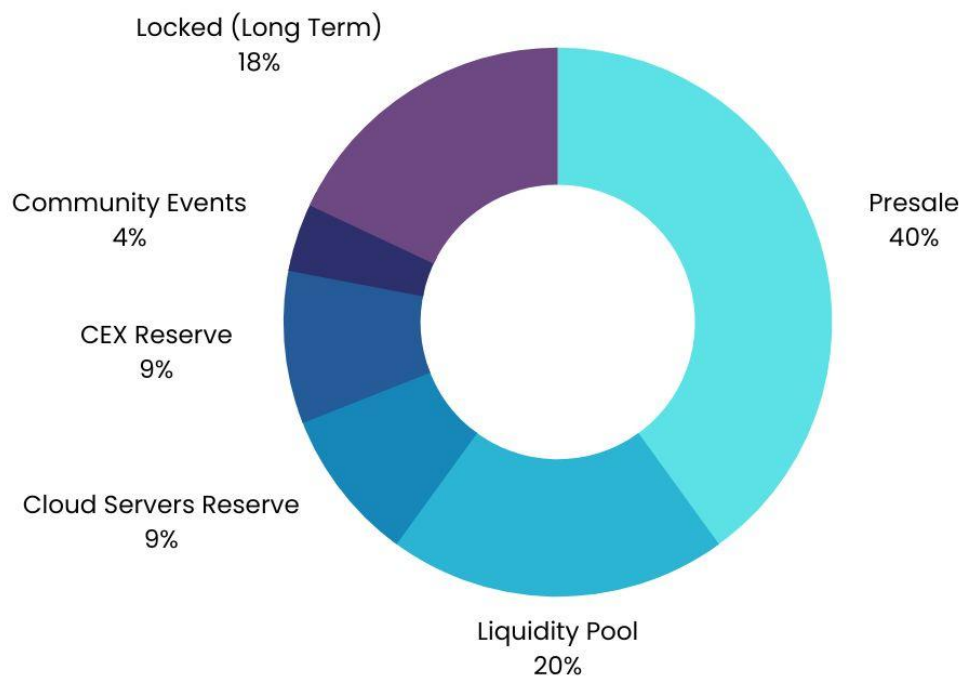

Liquidity Pool Fee will cover the issue of slippage, the bigger the trading volume, the bigger the liquidity pool will become over time, helping significantly to prevent slippage losses.

3.2 OVE Launch

Oryve has prepared 2 possible variations of OVE Token Launch, The "optimal" variant and The "Soft" variant, both are explained below:

3.2.1 The Optimal Variant

Locked (Long Term) 18%
Community Events 4%
CEX Reserve 9%
Cloud Servers Reserve 9%
Liquidity Pool 20%
Presale 40%

IMPORTANT TAKE AWAYS!:

- Presale purchased Tokens will be distributed prior/during the Token Launch,

- CEX Reserve (9% of Total Supply) will be locked for AT LEAST 1 MONTH prior to Launch,

- Cloud Servers Reserve (9% of Total Supply) will be locked for AT LEAST 3 WEEKS prior to Launch,

- Community Events (4% of Total Supply) will be locked for AT LEAST 4 DAYS prior to Launch,

- Liquidity will be locked for AT LEAST 2 MONTHS during the launch.

3.2.2 The Soft Variant
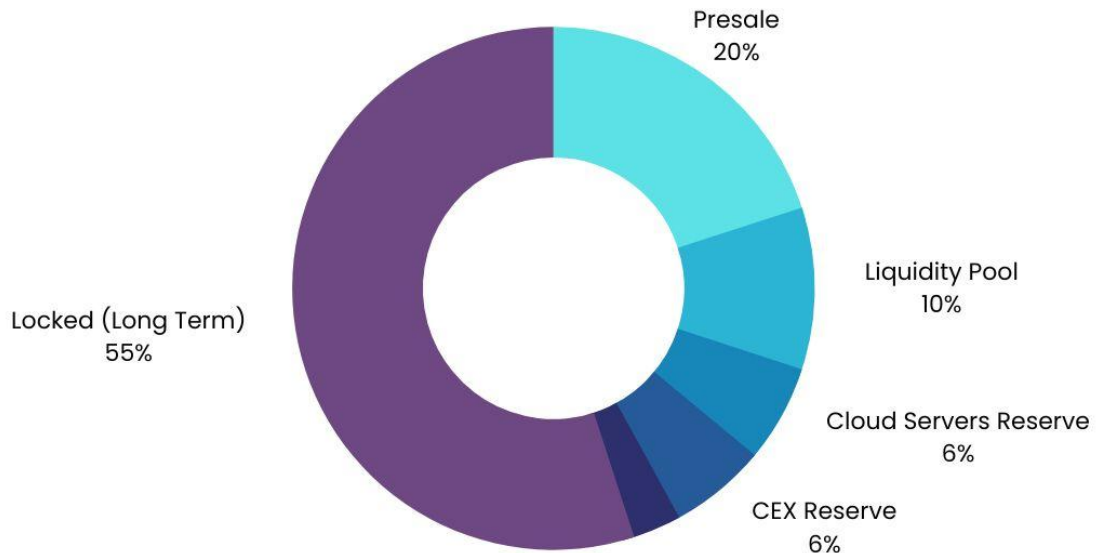

Pie chart values:
- Presale 20%
- Liquidity Pool 10%
- Cloud Servers Reserve 6%
- CEX Reserve 6%
- Locked (Long Term) 55%

IMPORTANT TAKE AWAYS!:

- Presale purchased Tokens will be distributed prior/during the Token Launch,

- CEX Reserve (6% of Total Supply) will be locked for AT LEAST 1 MONTH prior to Launch,

- Cloud Servers Reserve (6% of Total Supply) will be locked for AT LEAST 3 WEEKS prior to Launch,

- Community Events (3% of Total Supply) will be locked for AT LEAST 4 DAYS prior to Launch,

- Liquidity will be locked for AT LEAST 1.5 MONTH during the launch.

Variant Choice is dependant on many variables.

These will be disclosed on our Telegram Group.

Presale will happen in a fully private manner without a usage of outside Launchpads.

Predicted Size of a Presale is 30BNB for optimal variant;
At least 10BNB for Soft variant.

We encourage you to keep in touch with updates as well as to not hesitate to ask questions! Suppport & Developer are up to answer all your doubts.

4. Oryve Feed

Oryve Feed is a Reddit API based app, which allows you to sure Reddit without the need to log in or process any of your data.

App was made to fully protect your privacy and is yours to use.
No Ads, No additional content, pure form of a popular app.

5. Oryve Swap

Oryve Swap allows you to swap cryptocurrencies across multiple blockchains with the fee applied by flooz.trade.
Oryve Swap also lets you purchase cryptocurrency through card.

Oryve is NOT a provider of above given services and is only a middle-man, that is NOT charging any fee. The only fee that you might encounter is proceeded fully by flooz.trade and Oryve is not a part of it.

6. Oryve Safety Measures

Oryve has gone through multiple safety & security procedures to ensure that community members feel at home.

These Include, but are not limited to:

- KYC by KEYA

- Smart Contract Audit by TechRate

- Smart Contract Audit by CoinTool

- Website Audit by GTmetrix

- BSCScan Contract Verification

Above given resources can be found on our website (oryve.xyz) across multiple sections or in the footer section directly.

There is also a dedicated "Security" Section for our partners in providing you peace of mind.

7. Services

Oryve is a provider of technology services, which are mainly focused about Web development, app development, Smart Contracts and Design, but we are opened for any idea.
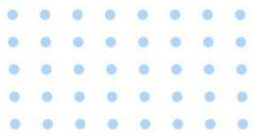

If you wish to cooperate with Oryve, as a client, you can contact us right away through any e-mail given in Section 1.2, or any Telegram also given in Section 1.2, we can't wait to hear your idea!

8. Summary & Final Words

Oryve is a constantly moving project. With a dedicated team and insane amount of effort, we believe that Oryverse can be the next space to actually be a part of Metaverse mainstream. With implements like OVE Token & Multiple other apps developed under our wings, there's nothing to aim but success

~Oryve Team
